The Group's activities are primarily operated in the PRC and the Group's revenue is mainly attributable to customers in PRC.

In 2022, the Group took the initiative to develop the business of industrial electronic intelligent control equipment, mechanical equipment, industrial control numerical control ("CNC") system, and general parts processing and manufacturing. At present, the Group purchased a batch of multi-axis drilling machine, grinding machine and radial drilling machine and other equipment, for metal castings and metal products (such as bed, bed legs, headstock, pressure film, briquetting, nut and other castings and forgings) processing, manufacturing and production. The Company's CNC machine tool and optical machine will apply to different fields, including raw materials, production and processing, the Company will soon launch a variety of high-end CNC machine tool and optical machine products to enhance the enterprise's own product innovation and market expansion. In addition, the Company's industrial automation control system and electronic equipment products will also be upgraded to improve the performance and competitiveness of the products. The Group will continue to purchase a series of processing equipment to develop new products.

The Group has signed letters of intent for cooperation with a number of agent dealers, mainly metal casting and forging factories and precision machinery companies. The suppliers mainly include manufacturers of metal casting and forging parts, while the customers of the Company include trading enterprises and production companies. The Company's marketing team will continue to expand business in Hangzhou, Jiaxing, Shanghai, Shaoxing, Nanjing, Wuxi, Huai'an, Linhai, Quzhou and other cities, continues to increase new sales customers, and actively explore more cities' markets.

In 2022, due to the Novel Coronavirus ("COVID-19") outbreak, the control measures in various places have greatly affected logistics and transportation, resulting in a significant decline in the company's operating performance. The group is gradually expanding its existing business, such as CNC machine tools and optical machine products, and is waiting for the market opportunity to expand its scale and business under the best market conditions.

The reason for the decrease is due to the control measures and logistics and transportation in Jiangsu, Zhejiang and Shanghai customer markets, which resulted in a decrease in the Group's operation compared with the same period last year.

For the three months ended 31 March 2022, loss attributable to shareholders was approximately RMB1,787,000 (2021: RMB1,564,000), representing an increase of loss of approximately RMB223,000.
